

To provide VHA healthcare professionals with current practice standards and emerging trends in the treatment of Parkinson's Disease and other movement disorders

Sponsored by PADRECC & EES

1 hour Audio Conference using VANTS

“Pharmacotherapy of Motor & Non-Motor Symptoms in Parkinson's Disease”

Kathryn Tortorice, PharmD, BCPS, National PBM, Clinical Pharmacy Program Manager, Hines, IL

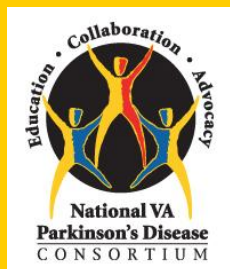

Host: Southeast (Richmond) PADRECC

Thursday, March 14, 2013

12:00 PM - 1:00 PM Eastern

or

3:00 PM - 4:00 PM Eastern

Call in on VANTS 1-800-767-1750 Access code: 53353

Register on Talent Management System (TMS):

https://www.tms.va.gov/learning/user/deeplink_redirect.jsp?linkId=ITEM_DETAILS&componentID=16261&componentTypeID=VA&revisionDate=1360164600000

Note: this link takes you to the TMS Login page. After logging in, click on “View Offerings” to register. You must register no later than March 13th (the day before the presentation).

Registration/Handouts/Evaluation/Continuing Education Credits:

- Pre-registration is required through TMS. See link above.
- Obtain course brochure and handouts (PowerPoint slides) in TMS. PowerPoint slides for this talk will also be posted on PADRECC website www.parkinsons.va.gov/clinicians.asp
- Continuing education credits available for: **physicians, physician assistants, nurses, pharmacists, and psychologists** who register and complete online evaluation on TMS.

Description: The purpose of this audio conference is to increase the participant's knowledge and skill in managing medications used in treating people with Parkinson's disease (PD). Medication regimens for PD are often complex due to a variety of motor and non-motor symptoms, as well as co-morbid conditions the patient may have. This knowledge based activity is the third in a six-part series on Movement Disorders in FY2013.

Outcome Objectives: At the conclusion of this educational program, learners will be able to:

1. Describe the clinical progression of PD and the pharmacological treatment plan for early PD.
2. Discuss the management of “off time” motor symptoms.
3. Identify the advantages of atypical antipsychotic therapies in the management of Parkinson's related psychosis and dementia.
4. List the differences in dopamine agonist agent dosage forms that can be utilized to improve therapy.
5. Explain the role of over the counter vitamins and supplements in the treatment of Parkinson's Disease.
